

Saif Khan

Cyber Security Learner | Linux | Networking | Python | VAPT
Mymensingh, Bangladesh

PROFILE

Diploma in Computer Science & Technology student focused on cybersecurity, Linux, networking, Python, web security, and hands-on security labs. Building practical security skills through structured learning, labs, and security-focused projects.

EDUCATION

Diploma in Computer Science & Technology

Mymensingh Polytechnic Institute | Session: 2024–25

Currently studying: 3rd Semester

CYBERSECURITY FOCUS

- Cybersecurity Fundamentals & VAPT
- Linux Administration & Hardening
- Networking Fundamentals (TCP/IP, DNS, HTTP/HTTPS, Subnetting)
- Web Security Fundamentals
- Security Labs & CTF Practice
- Python Security Automation

TECHNICAL SKILLS

Security Tools: Nmap, Wireshark, Burp Suite, OWASP ZAP, Metasploit, Gobuster

Systems: Linux, Bash, Git & GitHub

Programming: Python, JavaScript Fundamentals

PROJECTS

- Port Scanner — Python-based TCP port scanning tool for authorized lab environments.
- Linux Hardening Toolkit — Bash-based utility for repeatable Linux security checks and hardening tasks.
- Log Analyzer — Security-focused log parsing and anomaly identification project.
- Network Scanner — Python/Scapy-based local network discovery project.
- Password Strength Analyzer — Tool for evaluating password patterns against security rules.

LEARNING & CAREER GOALS

Hands-on cybersecurity development with a long-term goal of progressing toward eJPT, PNPT, and OSCP-level practical skills.
